For Spread Creative: provide your artwork as single page ad files using the Full Page specs shown above.

Materials: Ads are to be supplied via email as high-res PDF with all fonts embedded or on disc, using standard graphics software (e.g. In-Design, Illustrator, Photoshop, Postscript). All original artwork files (e.g. graphics, scans etc.) and fonts must be included. Please label the type of software used and the version, and include a hardcopy printout of the files contained on the disk. No trapping. Minimum 300 DPI. A full-size color proof is also requested for visual reference to ensure color matching. This proof should ideally be submitted on a gloss substrate. If your files do not print properly for you, it's likely they will not output for us either.
